

touch. choose. explore.

Touch the advanced, responsive touchscreen. Choose the browser, music player, 2.0 megapixel camera or one of dozens of other applications. Explore all the things you can do with one of the world's most advanced touchscreen devices. The Samsung Delve™ is a lot more than just a phone. It's the new centerpiece of your communication and entertainment life. To go.

qwerty keyboard

The Delve™ has a unique onscreen QWERTY keyboard you can access in landscape or portrait mode (or even switch between the two). In either mode, the Delve™ lets you type as fast as you talk.

full html browser

With a full HTML browser, the Delve lets you surf the Web like you want to. View your favorite sites. Bookmark your favorite sites. And do it all quickly.

2.0 megapixel camera with camcorder

This SAMSUNG has a built-in 2.0 megapixel camera and camcorder, so you can take beautiful pictures and videos anytime. You can also share your work, shoot in low light with Night Shot and view it all in thumbnails or see larger previews in the filmstrip mode.

widgets

When you want to get to an application, you want to get to it quickly. That's why the Delve™ supports widgets, so you can just click and go.
