

superior style meets superior resolution

The SAMSUNG Impression™ combines a brilliant, widescreen touch screen display with a full, slide-out QWERTY keyboard to give you one very attractive phone. With its full messaging capabilities, PC Studio Manager and customizable Widget Bar, the Impression™ is a complete communications tool that will always make a good impression.

3.2" AMOLED brilliant, widescreen display

The 3.2" brilliant, widescreen display, driven by the new AMOLED technology, offers a vivid, crystal-clear viewing experience that lets you fully enjoy videos, websites, games and more.

slide-out QWERTY keyboard

Texting friends and replying to email are fun and easy with the Impression's horizontal slide-out QWERTY keyboard.

full messaging capabilities

Pull out the keyboard and press the one-touch messaging key for speedy text messaging, or take advantage of the full QWERTY and easily send instant messages and email.

customizable widget bar

The Impression's Widget Bar gives you quick access to your favorite applications. You can change and rearrange the widgets, so that your most often used programs are always at your fingertips.

pc studio manager

Users can synchronize their pictures, music, photos and videos between their Samsung Impression(TM) and their PCs. To make things easy, PC Studio offers a set of tools and wizards for basic and advanced entertainment needs. They have the ability to edit photos taken from their phone, create playlists from a computer to come with them on the go, or download videos from their night on the town. In addition, the toolbox feature lets you have access to applications that allow you to burn CDs into your music library, create slideshows of your images, and modify your personal videos. They can also upload photos and videos to programs like u-tube and Flickr to keep friends up to date on what's happening in their lives.
