

## a touch of amazing

There are touchscreens, and then there's the SAMSUNG Instinct™, the touchscreen that keeps you in touch better than any other. Everything on the Instinct™ is designed to take you right to where you want to go faster. Go right to your favorite contact or Web page by putting them in your favorites folder. Go right to your client meeting with GPS turn-by-turn directions. Go right to the one voicemail message you really want to listen to. With the Instinct™, everything is just a touch away.

### full touchscreen

The Instinct's touchscreen isn't just for fun. It's an exceptionally sophisticated input method that is exceptionally easy to use. And whether you use your finger or a stylus, the Instinct™ responds to every touch with a slight vibration. Everyone likes a little feedback, right?

### advanced GPS navigation with live search

Sure, the Instinct™ gives you GPS Navigation with audible turn-by-turn directions. But with Live Search, you can use that GPS technology to search for the nearest gas station by location, price or even grade of gasoline. It's a whole new way to get where you're going.

### high-speed wireless & multimedia capabilities

Everything on the Instinct™ is fast. You want the Internet? The Instinct™ loads every page fast. You want music downloads? They download fast. Movies? You'll be eating popcorn in no time. Now that's entertainment.

### visual voicemail

With the Instinct™, you don't have to listen to voicemail anymore. Just one quick glance at the Visual Voicemail display and you'll know who called and when. In other words, you can delete all those messages from your mom without even listening to them (but don't tell her).

## accessories included

By now, you know the Instinct™ comes loaded with all kinds of good stuff. Well, the box is stuffed, too. Standard accessories include a 2 GB microSD™ card, a microSD™ card adaptor, an extra Lithium Ion battery, a battery charging case, a phone carrying case, a 3.5 mm stereo headset, a charging USB cable and a stylus.
