

SBH700 STEREO BLUETOOTH® HEADSET

ASBH700JSECXAR SPECIFICATION SHEET

If you are looking for a headset that can perform with your active lifestyle while keeping you connected and entertained, the sporty SAMSUNG Stereo Bluetooth Headset (SBH700) is at the head of the game. The SBH700 wirelessly connects to your Bluetooth-enabled devices so you can enjoy full fidelity music and audio without getting tripped up in a tangled mess. It's a true champion in sound quality. With kernel type earpieces, this headset creates an effective ambient noise-blocking seal in the ear canal.

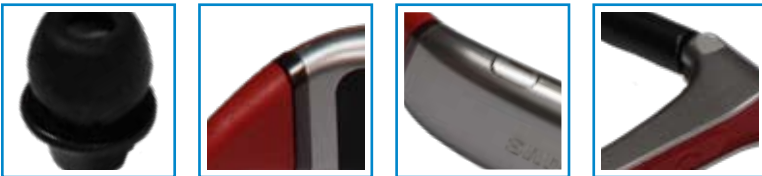

The versatile SBH700 performs double-duty with ease, connecting to multiple Bluetooth devices simultaneously. This means you can enjoy your favorite tunes and, when a call comes in, the music fades out while your ring tone sounds. The SBH700 instantly converts from a music headset to a hands-free phone headset with an integrated microphone. When your call ends, the unit smoothly returns to its previous audio settings.

The headset is designed to be both sleek and user-friendly, with the primary controls conveniently located on the earhooks themselves. The soft, behind-the-neck headband and earhooks provide a comfortable and secure fit, even when you are active. The SBH700 also prevents interference with standard consumer-grade electronic equipment and call monitoring by eavesdropping third parties.

If you want a high-performance headset that won't keep you tied down, the SBH700 is a fan favorite.

FEATURES

Bluetooth Headset Pairing Instructions

1. When you turn on your Samsung Bluetooth headset for the first time, it proceeds into pairing mode immediately.
2. If you have paired the headset with other Bluetooth devices, make sure that the headset is off. Turn on the headset while pressing and holding the  button until the blue indicator light stays solid blue after blinking.
3. Set your Bluetooth phone to discover the headset by following your phone's guide. Typically, the steps involve going to a 'Settings', 'Connection', or 'Bluetooth' menu on your phone and then selecting the option to discover Bluetooth devices.
4. Your phone will find the Samsung headset and ask if you want to pair with it. Confirm this by pressing the Yes or OK key.
5. Enter a passkey or PIN, 0000 (4 zeros), then press the Yes or OK key.
6. If pairing was successful, the indicator light will flash in blue 10 times rapidly before going to flashing every 3 seconds. If unsuccessful, the light remains on, and you will need to re-attempt pairing.
7. When you turn on your headset after pairing with the phone, the headset is automatically connected to the phone.
8. When you turn on your phone after pairing with the headset, the phone is connected to the headset by pressing the Multi-Function button.

“number one in brand loyalty seven years in a row”

Samsung mobile phones have been rated number one in brand loyalty by consumers seven years in a row, according to Brand Keys, a leading independent authority on brand loyalty.
